**CBRE:  
A new partnership**

“

We found Mercury to be forward thinking and intuitive to customer’s needs. There are **professional throughout and clearly very passionate about what they do.** Lines of communication are always clear and defined. Work on site was done to a good standard and left clean and tidy..

Matt Evans, CBRE

**PROJECT ONE - Telford**

Project duration: Two days

**1 CLIENT BRIEF**

The stores gas fired hot water tank had failed and was considered beyond economical repair. It was positioned in a 1st floor plant room with poor access.

**2 OUR SOLUTION**

Replace Hamworthy direct gas fired hot water tank like-for-like. Complete all water, gas and flue connections. Chlorinate and commission new system. After using a crane to position the tank on the roof, we manually transferred that unit to its final position within the plant room.

**3 PROJECT RESULT**

Reinstated hot water to the store within short period of time.

**PROJECT TWO - Worcester**

Project duration: One day

**1 CLIENT BRIEF**

A 1000 litre in-direct hot water tank, integral to an Air Handling Unit located on the roof, had failed and was considered beyond economical repair. The tank serves hot water to the building and its operation is fundamental to the opening of the store.

**2 OUR SOLUTION**

Manufacture and install the new tank like-for-like, complete all connections and chlorination. Due to the size of tank and its location, it needed a contact crane lift to aid it into position. We also altered the AHUs access panels to the tank section to aid with future maintenance for the CBRE team.

**3 PROJECT RESULT**

Reinstated hot water to the store within short period of time.
